Jonathan,

Here is a proposal for cleaning of Tank 30 that was received from Tom Crenshaw. This proposal was requested by Murphy in late 2012.

Tom Crenshaw will not be able to treat the hazardous waste as he mentions in his proposal, but there is pricing information. He would need to resubmit for current pricing.

I would recommend sending this to Bubba Gamble so he can compare costs and approach for Tank 30.

Alonzo

Mr. Murphy,

I was asked to bid on the cleaning of Tank 30. I have visited with Alonzo to help clarify the scope and if the material is hazardous or not and how we can treat it to minimized the hazardous portion to decrease disposal costs. The proposal is attached and Alonzo asked if I would copy him. If I can be of any further assistance please contact me at your convenience. My contact information is

below. We are working on site now so mobilization costs would be less if we can roll over to this job. We should be complete with the air machine in two weeks. We do have another one if needed. We can decide payment terms if job is awarded to Welfab, Inc. If your in need of someone to complete floating roof removal, we would be interest not only in it but any piping or equipment setting you may need at your location. We have worked at this facility and at the dock for numerous years.

Thank you,  
Tom
